Title Urban Environment Designer (Green Infrastructure Designer & Drainage Project Technician)

Department Engineering Department

Job Status Temporary Full Time

Posting Status Accepting Applications

Employment Group CUPE

Job ID 93/16

Nature & Scope of Work This opportunity is to approximately April 2017.

This is complex technical design work of a landscape architectural nature performed in the field and office. The incumbent coordinates the implementation of landscape development projects; develops design proposals and conceptual plans; prepares detailed plans, drawings, cost estimates, specifications and tender documents; inspects construction and recommends specification changes during construction as required; and maintains liaison with a variety of internal and external contacts. The incumbent exercises considerable independence of judgement and action within established policies and guidelines and discusses unusual problems or policy matters with a superior who reviews work performance in terms of technical competence, conformance to established policies and procedures and achievement of desired objectives.

Required Knowledge, Skills and Abilities

- Thorough knowledge of landscape design methods, principles and practices, particularly relating to green infrastructure (e.g.: rain gardens) and streets/boulevards;
- Considerable knowledge of computerized drafting (AutoCAD), mapping (ArcGIS) and graphics principles, techniques, and related software;
- Considerable knowledge of landscape construction methods and materials and ornamental horticultural techniques and practices;
- Considerable knowledge of the policies, procedures and by-laws governing the work;
- Ability to coordinate the implementation of landscape development projects and assist in project budget planning and control of construction progress and expenditures;
- Ability to develop design proposals and conceptual plans for landscape development projects; to prepare detailed plans, drawings, maps, specifications, cost estimates and tender documents applicable to the work; and to read and interpret engineering plans and specifications;
- Ability to manage complex drainage-related projects and coordinate/review the work of consultants and contractors;
- Ability to establish and maintain effective working relationships with a variety of internal and external contacts, and to conduct meetings with community groups, department and municipal staff concerning matters related to the work;
- Ability to prepare reports, studies and analyses related to areas such as landscape development, ecological monitoring and related matters, and to prepare and maintain a variety of files and records related to the work.

Desirable Training & Experience Graduation from an institute of technology diploma program in landscape design and horticulture or a related discipline plus sound related experience; or an equivalent combination of training and experience is desired. Experience with hydrological measurements/monitoring and development of integrated storm water management plans is also an asset.

Required Licences, Certificates and Registrations Valid Class 5 British Columbia Driver's Licence.

Safety Requirements Incumbents are required to follow all applicable Safe Work Procedures, participate in Occupational Health & Safety training, meetings and to report any hazards in the workplace.

Hours of Work 35 Hour Work Week
Compensation, Salary Pay Grade 25
and Benefits \$35.43, 36.91, 38.52, 40.16, 41.82 per hour (2015 rates).

Posting Date 5/25/2016
