[Apply Now](#)**Title** Systems Analyst**Department** Information Technology**Job Status** Regular Full Time**Posting Status** Accepting Applications**Employment Group** CUPE**Job ID** 19-177

**Nature & Scope of Work** This is complex analytical and technical work conducted in response to a wide range of business requirements and which encompasses all phases of computer projects such as systems analysis, procedure documentation, process design, implementation and operation. An employee of this class analyzes existing and proposed systems and procedures, devises and develops information systems solutions to business problems and designs and initiates programs according to requirements. A considerable degree of independent judgement and action is exercised in the performance of specialized technical programming and system analysis work. Work performance is reviewed and evaluated by a superior in terms of effective services rendered and achievement of desired objectives. This position will primarily support Delta's IBM Maximo Enterprise Asset Management and Kronos Telestaff systems.

**Required Knowledge, Skills and Abilities**

- Thorough knowledge of problem definition and resolution techniques applicable to the development and implementation of information technologies in response to business requirements.
- Ability to analyze and evaluate data and information requirements and to develop logical solutions for assigned problems.
- Ability to act as project leader in the design and implementation of new and modified business processes and systems.
- Ability to communicate effectively orally and in writing and to prepare and maintain technical reports and documentation.
- Expert knowledge and experience with IBM Maximo 7.6 including but not limited to Maximo System administration, Maximo Application Designer, Maximo Integration Framework, and Cron tasks.
- Knowledge and understanding of Enterprise Asset Management in an Engineering Operations environment.
- Knowledge and experience with Microsoft SQL Server 2012 or greater including query building and schema design.
- Knowledge and experience with Kronos Telestaff would be an asset.

**Desirable Training & Experience** Completion of a two-year diploma course from a Technical Institute in information technology, systems analysis and procedures, plus considerable related experience in business and systems analysis, preferably in a municipality, or an equivalent combination of training and experience.

**Required Licences, Certificates and Registrations** Valid BC Class 5 Driver's Licence for the Province of British Columbia.

**Safety Requirements** Incumbents are required to follow all applicable Safe Work Procedures, participate in Occupational Health & Safety training, meetings and to report any hazards in the workplace.

**Hours of Work** 35 hour work week**Pay Grade** 26**Pay Rates** \$39.56, 41.29, 43.04, 44.83, 46.75 per hour**Posting Date** 10/16/2019**Posting Closing Date** 10/23/2019[Apply Now](#)
